

SHAPOVAL DMYTRO

FrontEnd Developer

updated 1 October 2025

TECH SKILLS

FrontEnd

ES5+, TypeScript, React,
React Native, Redux,
Redux Toolkit, Saga, Webpack,
WML, NPM, RVM, fastlane

Layout

HTML 5, CSS 3, Flexbox, BEM,
Less, Animate.css, WOW.js,
styled-components, SVG(XML),
Bootstrap 4+, Google Fonts,
Font Awesome, React Material-UI

Testing

End-to-End, Unit, Detox, Xpath,
Jest, Enzyme, Chai, Mocha,
Sinon

BackEnd

Node.js, Express.js, NestJS

Databases

MySQL, MongoDB, PostgreSQL

VCS

Git (GitHub, GitLab, Bitbucket)

Virtualization

Docker/Docker Compose

OS

Linux, macOS, Windows

Software

WebStorm, Android Studio,
Xcode, Keychain Access,
GitKraken, Git Extensions, JIRA,
ClickUp, Figma, GIMP, Photoshop,
Slack, Brackets

EXPERIENCE

• FrontEnd | Development and support of mobile applications

DBB Software

React Native | 25.12.2020 – 01.10.2023

Full-time, hybrid (office + remote)

Involved in adding functionality to mobile applications, fixing bugs and improving performance.

Wrote scripts, including a theme generator, in **JavaScript** and **Fastlane** to replace data in the application, followed by assembly and uploading to application stores. This allowed us to create, update and support up to 200+ branded applications for **iOS** and **Android**.

Also worked on updating versions of React Native, transferring project repositories from a custom server to Gitlab and setting up **CI/CD Gitlab**.

Integrated of new APIs and libraries.

Actively worked with mobile application store interfaces:

Google Play Console and **Apple Store Connect**. Including certificates, provisioning profiles, keys, application signing, etc.

• FrontEnd | Development and support of mobile applications

AstroAction OÜ

React Native | 15.01.2024 – 01.07.2024

Part-time, remote.

Involved in adding functionality to mobile apps, fixing complex bugs, and improving performance.

Diagnosed and resolved highly complex, intermittent defects (Heisenbugs) and subtle visual glitches.

Writing **JavaScript** and **Fastlane** scripts to automate app data updates, followed by building and uploading to app stores.

• FrontEnd | Development and support of mobile applications

Ad-Hoc Project Support (IT)

React Native | 01.07.2024 – 01.11.2024

Part-time, remote.

Provided technical assistance and made necessary corrections/updates on various short-term IT projects obtained through personal contacts.

• Project Co-founder | Product Manager | FrontEnd Developer

KART (Startup in the field of podology and cosmetology)

React Native | 01.11.2024 – 01.05.2025

Full-time, remote.

Developed the project from a raw idea to the MVP-ready stage.

TECH SKILLS

Software development

Agile(Scrum, Kanban)

Other

Functional programming, SOLID, DDD, Canvas, XMLHttpRequest, Fetch, Axios, RESTful API, WebSocket, Promise, Async/Await, Oauth, react-native-webview, react-native-track-player, push notifications, MVC, SEO, CI/CD, Dropbox API, Elasticsearch/Elasticsearch-PHP, OSI Network Model, Google Sheets + Google Apps Script, bash....

KNOWLEDGE OF LANGUAGES

English - Pre-Intermediate;

Russian - Proficiency;

Ukrainian - Native.

OBJECTIVE

After gaining broad hands-on experience in frontend (particularly in mobile applications) — from early product concepts and client communication to CI/CD pipelines, publishing, and app maintenance — my goal is to join a stable company, where I can grow as a full-time React Native/React developer.

I'm looking to deepen my technical expertise, contribute to real-world products, and build a long-term collaboration based on reliability, learning, and professional growth.

Worked with two co-founders (idea and funding owners) to clarify and structure the initial, raw concept, resolving contradictions in their vision (product idea, user personas, business data, etc.) and preparing coherent requirements for development.

Facilitated structured discussions, validated the business idea, and translated insights into functional requirements, user stories, and technical documentation.

*Identified and evaluated potential team members (backend developer, designer), explained to co-founders why they were suitable, and obtained approval to move forward. Implemented project-management processes in **ClickUp** and introduced **Scrum** principles.*

Co-created UX flows and UI mockups with the designer, and selected technologies and libraries for the frontend (React Native).

Despite a very limited budget and vague initial direction, managed to bring the project to a clear, development-ready state.

• FrontEnd | Development and support of mobile applications

Ad-Hoc Project Support (IT)

React Native | 01.06.2025 – 01.10.2025

Part-time, remote.

Provided technical assistance and made necessary corrections/updates on various short-term IT projects obtained through personal contacts.

EDUCATION

Course | FrontEnd

IT-College DevEducation(Kyiv)

FrontEnd Developer | 30.09.2019 – 31.01.2020

Electronics and computer technology | Telecommunications and radio engineering

Dnipro State Technical University

Master's Degree | 01.09.2018 – 31.12.2019

Theme of my diploma: "Smart home based on the ESP8266 microcontroller."

Electronics and computer technology | Telecommunications and radio engineering

Dnipro State Technical University

Bachelor's Degree | 01.09.2015 – 30.06.2018

Radio engineering | Design, production and maintenance of radio devices

College of Radio Electronics

Associate Degree | 2011 – 2015 Honors degree.

SUMMARY

Since **2016**, I began to program Atmega8 and Atmega32 microcontrollers using programming language Assembler at the University.

In the same year, I became interested in web development: I started learning HTML5, CSS3, JS and made up single-page websites for personal use.

From **2017** till **2018**, I learned contextual advertising using Yandex.Direct and Google AdWords, working as a realtor.

In **2018**, I continued to learn web development, and at that time I had invested over 1000 hours into studying it.

In September **2019**, I accessed to the FrontEnd course at the Dev Education IT College, where I studied for 4 months.

In the courses I gained experience in 4 different teams.

In the 4th month of the courses, I worked in an international training project in which my team took third place among 8 teams. By that time, I had invested 2500+ hours in web development training.

In January **2021**, I switched to developing mobile applications using React Native.

ADDITIONAL INFORMATION

1) I have full-cycle experience in software development — from refining raw ideas and communicating with non-technical clients to writing code, setting up build pipelines, publishing apps to stores, and managing updates.

This helped me develop a product-oriented mindset, understand real-world challenges, and stay focused on delivering stable, maintainable solutions.

2) I've always maintained strong consistency and reliability — I never missed classes during school or university, and later worked almost 3 years without a full vacation. Even during the war, including blackouts and unstable internet or power supply, I kept working remotely and stayed focused on results.

3) I regularly use time-management techniques (such as the Pomodoro method) and track working hours to analyze and improve productivity.

4) In my free time, I enjoyed developing a smart home system based on the ESP8266 NodeMCU microcontroller.

Today, I'm also interested in smart home technologies.

5) I've been using Linux as my main working OS for over 7 years.

6) I can independently set up and maintain a reliable work environment — including installing operating systems (Linux, Windows), configuring software, ensuring stable power and internet connection, and maintaining hardware.

7) I'm fluent in touch typing in Russian and English.

8) I lead an active lifestyle: I've been doing gymnastics since I was 14, running since I was 15, and I enjoy fitness.

9) I avoid bad habits and actively monitor my physical and emotional state to maintain high performance.

10) I have multiple practical experiences moving between **Kyiv** and **Dnipro**, which ensures high flexibility and quick adaptation to changing workplaces.
