TECH SKILLS

FrontEnd
ES5, ES6, React, Redux,
Chai, Mocha, Webpack 4

Layout
HTML 5, CSS 3, Flexbox, BEM,
Less, Animate.css, WOW.js,
Bootstrap 4, Google Fonts,
Font Awesome, React Material-UI

BackEnd
Node.js

VCS
Git (GitHub, Bitbucket), git-flow

Databases
MySQL, MongoDB

Software
JIRA, Figma, Photoshop, GIMP,
Git Extensions, WebStorm,
Sublime Text 3, Brackets

OS
Linux, Windows

Virtualization
Docker/Docker Compose

Software development
Agile(Scrum, Kanban)

Other
Functional programming, SOIID,
Canvas, MVC, XMLHttpRequest,
Promise, Asinc/Await,
Elasticsearch/Elasticsearch-PHP

SUMMARY

Since **2016**, I began to program Atmega8 and Atmega32 microcontrollers using programming language Assembler at the University.

In the same year, I became interested in web development: I learning HTML5, CSS3, JS and made up single-page websites for personal use.

From **2017** till **2018**, I learning contextual advertising Yandex.Direct and Google AdWords, working as a realtor.

In **2018**, I continued to learn web development, and now I have invested more than 1000 hours to learning it.

In September **2019**, I accessed to the FrontEnd course at the Dev Education IT College, where I studied for 4 months.

In the courses I gained experience in 4 different teams.

In the 4th month of the courses, I worked in an international training project in which my team took third place among 8 teams.

EDUCATION

Course, FontEnd
IT-College DevEducation(Kyiv)
Frontend Developer | 30.09.2019 - 31.01.2020

click me

Electronics and computer technology | Telecommunications and radio engineering
Dnipro State Technical University
Master's Degree | 01.09.2018 – 31.12.2019
Theme of my diploma: "Smart home based on the ESP8266 microcontroller."

Electronics and computer technology | Telecommunications and radio engineering
Dnipro State Technical University
Bachelor's Degree | 01.09.2015 – 30.06.2018

Radio engineering | Design, production and maintenance of radio devices
College of Radio Electronics
Associate Degree | 2011 – 2015   Honors degree.

KNOWLEDGE OF LANGUAGES

English - Pre-Intermediate;
Russian - Proficiency;
Ukrainian - Native.

OBJECTIVE

My objective is to start a career as a Junior FrontEnd developer and grow to a Strong Junior/Middle FrontEnd Developer in a year, working mainly with React and Node.js technologies.

ADDITIONAL INFORMATION

1) I've been using Linux as a working OS for 2 years.
2) I am fluent in the method of blind printing in Russian and English.
3) In my spare time, I like to work on developing a smart home based on the ESP8266 NodeMCU microcontroller.
4) I have always become a better student while studying at universities.
5) I almost never miss work / study even for important reasons.
6) I believe that perseverance, constancy and a strong desire are able to solve any task.
7) I have been practicing gymnastics since I was 14 years old
